

# Feedback Survey for 2018 ACE Innovative Teaching & Learning Workshop at Hokkaido University

In 2018 6U-HAPPIER hosted our ACE Innovative Teaching & Learning Workshop directed by Prof. Roderick Smith of Imperial College London at Hokkaido University on 13 and 14 September 2018. The workshop was attended by 10 people (8 from Hokkaido University and 2 from Tokyo Institute of Technology). Following the workshop, we had a questionnaire survey and received 9 responses. The results are summarized here.

- It was a very good experience to think about how to teach in nowadays. The communication with professors and other participants were good too. Maybe if some eating or drinking included in the workshop, we can have more chances to communicate in a relaxed mode.
- It was an enjoyable workshop that should be held regularly, either for young scientist or researcher but also all university staffs.
- Thank you very much to conduct an event such as HAPPIER.  
 Actually, right now I am a Doctoral Student (final year). I plan to join one university soon after graduation. The workshop related to teaching is necessary for pursuing my career in the future. It really opened my mind to realize how important the education is and how necessary we need to get involved in its development to deliver the knowledge to the student in an active-student learning system.  
 I have questions related to the innovative teaching from Prof. Rod Smith. Was it the only workshop from Prof. Rod Smith? Are there any other advanced workshops follow?  
 I am also wondering if the 6U-HAPPIER can be expanded not only in Japanese University but also the non-English-native developing countries, like Indonesia or some other ASEAN countries.  
 I really appreciate if you have plans to do so. Please let me know if there are any possibilities to have the similar workshop in some Indonesian universities in the close future.  
 Thank you very much.
- The workshop, the content is quite good, but unfortunately my English skill is not so good and i could not understand Prof. Smith said.  
 I would like to join another workshop, if possible, of course after i improve my English skill.
- I think 1-day workshop is more suitable for me because I can concentrate on the workshop. I learned a lot of things about English skills, education, and so on from the workshop. I would like to appreciate that.

Others: 1 Postdoc and 2 PhD students

Partly because the number of people who answered to this questionnaire is small, no correlations were found in the data, except for the strong correlation of  $r = 0.92$  with 99.9% significance between “satisfaction” and eventual “recommendation to others”.
